APPENDIX II

REGULATIONS FOR THE PHYSICAL EXAMINATION OF CANDIDATES FOR APPOINTMENT TO THE INDIAN RAILWAY SERVICE OF MECHANICAL ENGINEERS.

[These regulations are published for the convenience of candidates and in order to enable them to ascertain the probability of their coming up to the required physical standard. The regulations are also intended to provide guidelines to the medical examiners and a candidate who does not satisfy the minimum requirements prescribed in the regulations cannot be declared fit by the medical examiners. However while holding that a candidate is not fit according to the norms laid down in these regulations, it would be permissible for a Medical Board to recommend to the Government of India for reasons specifically recorded in writing that he may be admitted to service without disadvantage to Government.

It should, however, be clearly understood that the Government of India reserve to themselves absolute discretion to reject or accept any candidate after considering the report of the Medical Board.]

1. To be passed as fit for appointment a candidate must be in good mental and bodily health and free from any physical defect likely to interfere with the efficient performance of the duties of his appointment.

2. (a) In the matter of the correlation of age height and chest girth of candidates of Indian (including Anglo-Indian) race, it is left to the Medical Board to use whatever correlation figures are considered most suitable as a guide in the examination of the candidates. If there be any disproportion with regard to height, weight and chest girth the candidate should be hospitalised for investigations and X-Ray of the chest taken before the candidate is declared fit or not fit by the Board.

(b) However the minimum standards for height and chest girth, without which candidates cannot be accepted, are as follows :

	Height	Chest girth fully expanded	Expansion
Male candidates	152 Cm	84 Cm	5 Cm
Female candidates	150 Cm	79 Cm	5 Cm

The minimum height prescribed is relaxable in case of candidates, belonging to races such as Gorkhas, Garhwalis, Assamese, Nagaland Tribes, etc., whose average height is distinctly lower.

3. The candidate's height will be measured as follows :—

He will remove his shoes and be placed against the standard with his feet together and the weight thrown on the heels and not on the toes or other sides of the feet. He will stand erect without rigidity and with the heels, calves, buttocks and shoulders touching the standard; the chin will be depressed to bring the vertex of the head level under

the horizontal bar and the height will be recorded in centimetres and parts of a centimetre to halves.

4. The candidate's chest will be measured as follows :—

He will be made to stand erect with his feet together and to raise his arms over his head. The tape will be so adjusted round the chest that its upper edge touches the interior angles of the shoulder blades behind and lies in same horizontal plane when the tape is taken round the chest. The arms will then be lowered to hang loosely by the side and the care will be taken that the shoulders are not thrown upwards or backwards so as to displace the tape. The candidate will then be directed to take a deep inspiration several times and the maximum expansion of the chest will be carefully noted, and the minimum and maximum will then be recorded in centimetres, thus 84—89, 86—93, etc. In recording the measurements, fractions of less than $\frac{1}{2}$ centimetre should not be noted.

N.B.—The height and chest of the candidate should be measured twice before coming to a final decision.

5. The candidate will also be weighed and his weight recorded in kilograms; fractions of half a kilogram should not be noted.

6. The candidate's eye sight will be tested in accordance with the following rules. The result of each test will be recorded.

(i) General.—The candidate's eyes will be submitted to a general examination directed to the detection of any disease or abnormality. The candidate will be rejected if he suffers from any squint or morbid conditions of eyes, eye lids or contiguous structures of such a sort as to render or are likely at a future date to render him unfit for service.

(ii) Visual Acuity.—The examination for determining the acuteness of vision includes two tests one for distant, the other for near vision. Each eye will be examined separately.

There shall be no limit for minimum naked eye vision but the naked eye vision of the candidates shall, however, be recorded by the Medical Board or other medical authority in every case, as it will furnish the basic information in regard to the condition of the eye.

The candidate will be examined with the apparatus and according to the method prescribed by the Railway Board's Standing Advisory Committee of Medical Officers, to determine his acuity of vision.

N.B.—No candidate will be accepted for appointment whose standard of vision does not come up to requirement specified below :—

The standard of visual acuity with or without glasses should be as follows :—

	Distant Vision	Near Vision	
	Better Eye	Worse Eye	Better Eye
For candidates below 35 years of age	6/6 or 6/9	6/12 or 6/9	II
			III

NOTE: (1)

(a) Total Myopia (including the cylinder) shall not exceed -4.00D.

(b) Total Hypermetropia (including the cylinder) shall not exceed +4.00D.

(c) In every case of myopia, fundus examination should be carried out and the results recorded. In the event of any pathological conditions being present which is likely to be progressive and effect the efficiency of the candidate, he shall be declared unfit.

NOTE : (2)

Colour Vision.

The testing of colour vision is compulsory and the results should be normal in respect of all candidates. Satisfactory colour vision constitutes recognition of signal red, green and white colours with ease and without hesitation. Both the Ishihara's plates and Edridge's Green lantern shall be used for testing colour vision.

Colour perception should be graded into higher and lower grade depending upon the size of the aperture in the lantern as described below :

Grade	Higher Grade of Colour Perception	Lower Grade of Colour Perception
1. Distance between the lamp and the candidate	16'	16'
2. Size of the aperture	1.3 mm.	13 mm.
3. Time for exposure	5 seconds	5 seconds

Higher grade of colour perception is essential for Special Class Apprentices.

NOTE : (3)

The field of vision shall be tested in respect of all Services by the confrontation method. Where such test gives unsatisfactory or doubtful results the field of vision should be determined on the perimeter.

NOTE : (4)

Night Blindness

Night blindness need not be tested as a routine, but only in special cases. No standard test for the testing of night blindness or dark adaptation is prescribed. The Medical Board should be given the discretion to improvise such rough tests e.g. recording of visual acuity with reduced illumination or by making the candidate recognise various objects in a darkened room after he has been there for 20 to 30 minutes. Candidate's own statements should not always be relied upon, but they should be given due consideration.

NOTE : (5)

Ocular conditions other than visual acuity :

- Any organic disease or a progressive refractive error which is likely to result in lowering the visual acuity should be considered as a disqualification.
- Squint.* The presence of binocular vision is essential. Squint, even if the visual acuity is of the prescribed standard, should be considered as a disqualification.
- One eyed person.* One eyed persons will not be eligible for appointment.

NOTE : (6)

Contact Lenses :

During the medical examination of a candidate, the use of contact lenses is not to be allowed. It is necessary that when conducting eye test, the illumination of the type letters for distant vision should have an illumination of 15 foot candles.

NOTE : (7)

It shall be open to Government to relax any one of the conditions in favour of any candidates for special reasons.

7. *Blood Pressure :*

The Board will use its discretion regarding Blood Pressure. A rough method of calculating normal maximum systolic pressure is as follows :—

- With young subjects 15—25 years of age the average is about 100 plus the age.
- With subjects over 25 years of age the general rule of 110 plus half the age seems quite satisfactory.

N.B.— As a general rule any systolic pressure over 140 mm and diastolic over 90 should be regarded as suspicious and the candidate should be hospitalised by the Board before giving their final opinion regarding the candidate's fitness or otherwise. The hospitalization report should indicate whether the rise in blood pressure is of a transient nature due to excitement etc. or whether it is due to any organic disease. In all such cases X-Ray and electrocardiographic examination of heart and blood urea clearance test should also be done as a routine. The final decision as to fitness or otherwise of a candidate will, however, rest with the medical board only.

Method of taking Blood Pressure :

The mercury manometer type of instrument should be used as a rule. The measurement should not be taken within fifteen minutes of any exercise or excitement. Provided the patient, and particularly his arm is relaxed he may be either lying or sitting. The arm is supported comfortably, at the patient's side in a more or less horizontal position. The arm should be freed from clothes to the shoulder. The cuff completely deflated, should be applied with the middle of the rubber over the inner side of the arm and its lower edge an inch or two above the bend of the elbow. The following turns of cloth bandage should spread evenly over the bag to avoid bulging during inflation.

The brachial artery is located by palpitation at the bend of the elbow and the stethoscope is then applied lightly and centrally over it below, but not in contact with the cuff. The cuff is inflated to about 200 mm. Hg. and then slowly deflated. The level at which the column stands when soft successive sounds are heard represents the Systolic Pressure. When more air is allowed to escape the sounds will be heard to increase in intensity. The level at which well-heard clear sounds change to soft muffled fading sounds represents the diastolic pressure. The measurements should be taken in a fairly brief period of time as prolonged pressure of the cuff is irritating to the patient and will vitiate the readings. Re-checking, if necessary, should be done only a few minutes after complete deflation of the cuff. (Sometimes, as the cuff is deflated sound are heard at a certain level they may disappear as pressure falls and reappear at a still lower level. This Silent Gap may cause error in reading).

8. The urine (passed in the presence of the examiner) should be examined and the result recorded. Where a Medical Board finds sugar present in a candidate's urine by the usual chemical tests, the Board will proceed with the examination with all its other aspects and will also specially note any signs of symptoms suggestive of the diabetes if except for the glycosuria the Board finds the candidate conforms to the standard of medical fitness required, they may pass the candidate 'fit subject to the glycosuria being non-diabetic' and the Board will refer the case to a specified specialist in Medicine who has hospital and laboratory facilities at his disposal. The Medical Specialist will carry out whatever examinations, clinical and laboratory, he considers necessary including a standard blood sugar tolerance test, and will submit his opinion to the Medical Board upon which the Medical Board will base its final opinion "fit" or "unfit". The candidate will not be required to appear in person before the Board on the second occasion. To exclude the effects of medication it may be necessary to retain a candidate for several days in hospital, under strict supervision.

9. A woman candidate who as a result of tests is found to be pregnant of 12 weeks standing or over, should be declared temporary unfit until the confinement is over. She should be re-examined for a fitness certificate six weeks after the date of confinement, subject to the production of a medical certificate of fitness from a registered medical practitioner.

10. The following additional points should be observed:—

(a) that the candidate's hearing in each ear is good and that there is no sign of disease of the ear. In case the hearing is defective, the candidate should be got examined by an Ear Specialist, provided that, if the defect is of a temporary nature, remediable by operation *but without the use of Hearing Aid*, and provided further that the candidate has no progressive disease in the ear, he can be declared fit. The following are the guidelines for the medical examination authorities in this regard:—

1. Marked or total deafness in one ear, other ear being normal.	Unfit for appointment as Special Class Apprentices.
2. Perceptive deafness in both ears in which some improvement is possible by a hearing aid	Unfit for Appointment as Special Class Apprentices.
3. Perforation of tympanic membrane of Central or marginal type	Any unhealed perforation of eardrum would disqualify but evidence of healed lesion would not be a cause for disqualification.
4. Ears with mastoid cavity sub-normal hearing on one side/ both sides.	Unfit for Appointment as Special Class Apprentices.
5. Persistently discharging ear—operated/unoperated	Temporarily unfit for both technical and non-technical jobs.
6. Chronic inflammatory/allergic conditions of nose with or without bony deformities of nasal septum.	(i) A decision will be taken as per circumstances of individual cases. (ii) If deviated nasal septum is present with symptoms—Temporarily unfit.
7. Chronic inflammatory conditions of tonsils and/or Larynx,	(i) Chronic inflammatory conditions of tonsils and/or Larynx—Fit. (ii) Hoarseness of voice of severe degree if present then—Temporarily unfit.
8. Benign or locally malignant tumours of the E. N. T.	(i) Benign tumours—Temporarily unfit. (ii) Malignant tumours—Unfit.
9. Otosclerosis	Unfit for Appointment as Special Class Apprentices.
10. Congenital defects of ear, nose or throat.	(i) If not interfering with functions—Fit. (ii) Stuttering of severe degree—Unfit.
11. Nasal Poly	Temporarily Unfit.

- (b) that his speech is without impediment;
- (c) that his teeth are in good order and that he is provided with dentures where necessary for effective mastication (well-filled teeth will be considered as sound);
- (d) that the chest is well formed and his chest expansion sufficient and that his heart and lungs are sound;
- (e) that there is no evidence of any abdominal disease;
- (f) that he is not ruptured;
- (g) that he does not suffer from hydrocele, varicose veins or piles;
- (h) that his limbs, hands and feet are well formed and developed and that there is free and perfect motion of all his joints;
- (i) that he does not suffer from any inveterate skin disease;
- (j) that there is no congenital malformation or defect;
- (k) that he does not bear traces of acute or chronic disease pointing to an impaired constitution;
- (l) that he bears marks of efficient vaccination; and
- (m) that he is free from communicable disease.

11. Radiographic examination of the chest should be done as a routine in all cases for detecting any abnormality of the heart and lungs which may not be apparent by ordinary physical examination.

When any defect is found it must be noted in the Certificate and the medical examiner should state his opinion whether or not it is likely to interfere with the efficient performance of the duties which will be required of the candidate.

Note.—Candidates are warned that there is no right of appeal from a Medical Board, special or standing appointed to determine their fitness for the above Service. If, however Government are satisfied on the evidence produced before them of the possibility of an error of judgment in the decision of the first Board, it is open to Government to allow an appeal to a second Board. Such evidence should be submitted within one month of the date of the communication in which the decision of the first Medical Board is communicated to the candidate, otherwise no request for an appeal to a second Medical Board will be considered.

If any medical certificate is produced by a candidate as a piece of evidence about the possibility of an error of judgment in the decision of the first Board, the certificate will not be taken into consideration unless it contains a note by the medical practitioner concerned to the effect that it has been given in full knowledge of the fact that the candidate has already been rejected as unfit for service by the Medical Board.

Medical Board's Report

The following intimation is made for the guidance of the Medical Examiner:

1. The standard of physical fitness to be adopted should make due allowance for the age and length of service, if any of the candidate concerned.

No person will be deemed qualified for admission to the public service who shall not satisfy Government, or the appointing authority, as the case may be, that he has no disease, constitutional affection, or bodily infirmity unfitness him, or likely to unfit him for that service.

It should be understood that the question of fitness involves the future as well as the present and that one of the main objects of medical examination is to secure continuous effective service, and in the case of candidates for permanent appointment to prevent early pension or payments in case of premature death. It is at the same time to be noted that the question is one of the likelihood of continuous effective service, and that rejection of a candidate need not be advised on account of the presence of a defect which in only a small proportion of cases is found to interfere with continuous effective service.

A lady doctor will be co-opted as a member of the Medical Board whenever a woman candidate is to be examined.

The report of the Medical Board should be treated as confidential.

In cases where a candidate is declared unfit for appointment in the Government service, the grounds for rejection may be communicated to the candidate in broad terms without giving minute details regarding the defects pointed out by the Medical Board.

In cases where a Medical Board considers that minor disability disqualifying a candidate for Government service can be cured by treatment (medical or surgical) a statement to that effect should be recorded by the Medical Board. There is no objection to a candidate being informed of the Board's opinion to this effect by the appointing authority and when a cure has been effected it will be open to the authority concerned to ask for another Medical Board.

(a) Candidate's statement and declaration.

APPENDIX III

CONDITIONS OF APPRENTICESHIP FOR SPECIAL CLASS APPRENTICES SELECTED THROUGH THIS EXAMINATION

The terms and conditions of Apprenticeship will be as set out in the form of agreement prescribed in the Indian Railway

Establishment manual, brief particulars of which are given below :—

1. A candidate selected for appointment as a Special Class Apprentice shall execute an agreement, binding himself and one surety jointly and severally to refund in the event of his failing to complete training to the satisfaction of the Central Government any money paid to him consequent on his appointment as Apprentice.

The apprentices will be liable to undergo practical and theoretical training for 4 years in the first instance under an indenture binding them to serve on the Indian Railways on the completion of their training, if their services are required. The continuance of apprenticeship from year to year will depend on satisfactory reports being received from the authorities under whom the apprentices may be working. If at any time during his apprenticeship, any apprentice does not satisfy the superior authorities that he is making good progress, he will be liable to be discharged from the apprenticeship.

Note.—The Government of India may at their discretion alter or modify the periods and courses of training.

2. The practical and theoretical training referred to above will be given in a railway workshop for four years of their apprenticeship. Special Class Apprentices must pass within this period either Parts 1 and 2 of the Council of Engineering Institutions Examination (London) or Section 'A' and 'B' of the Associate Membership of Institution of Engineers (India) Examination. The apprentices will be granted a stipend of Rs. 125 per mensem during the 1st and 2nd years and Rs. 175 per mensem during the 3rd and 4th years. During the apprenticeship the apprentices will be required to undergo training in four periods of one year each six months in the shops followed by six months in the School and will be examined at the end of each session. If unsuccessful at any of these examinations they will depending on their performance, be asked to sit for and pass in supplementary examination or reverted to the next lower batch or removed from apprenticeship.

NOTE.—Except as provided for in paragraph 4 below or in cases of discharge or dismissal due to insubordination, intemperance or other misconduct or breach of agreement, a week's notice of discharge from apprenticeship will be given.

3. Before the completion of 4th year of training referred to in paragraph 2 above, the apprentices will be listed in order of merit on the results of the examination held and the reports on the apprentices received during the period of apprenticeship. Successful apprentices will be appointed on probation for 3 years in the Indian Railway Service of Mechanical Engineers

NOTE.—An apprentice will be considered to have obtained the qualifying standard if he obtains a minimum of 50 per cent. marks in the aggregate in all the examinations held during the 4 years of his training including the marks of the reports of the Principal, Indian Railways School of Mechanical and Electrical Engineering, Jamalpur and of the Deputy Chief Mechanical Engineer, provided that in each of the 4 years he has obtained a minimum of 45 per cent marks in the aggregate and a minimum of 40 per cent. marks in any one subject.

4. Unsuccessful apprentices will be discharged from their apprenticeship, one month's notice of discharge being given along with the intimation that the apprentice has been unsuccessful.

5. During the 1st and 2nd years of probation they will be sent to one or more of the Indian Railways for undergoing training in accordance with the syllabus prescribed for the purpose as modified from time to time. The probationers may also be required to attend after working hours, a technical college or special lectures on engineering subjects. They will be given an oral test at the end of each phase of training during these two years of training and at the end of the 2nd year, they will be given a written test to be conducted jointly by the Chief Mechanical Engineer and the Chief Operating Superintendent of the Railway to which they are posted, on the training received by the probationers during this period. The qualifying marks at this test will be 50 per cent.

6. During the probationary period, they will have to attend a prescribed course of training in the Railway Staff College, Baroda and to qualify in the test held in the College. The test in the College is compulsory and a second chance, in the event of failure, will not be given except in exceptional circumstances and provided the record of the officers is such as to justify such relaxation being made. Failure to pass the test may involve the termination of service, and in any case, the officers will not be confirmed till they pass the test, their period of training and/or probation being extended as necessary. Before the end of second year of probation, they will be required to undergo a departmental examination which will include Accounting and Estimating General and Subsidiary Rules, Factory Act. Workmen's Compensation Act ability to handle labour and general application to work or works on which each officer is engaged while on probation. They will be required to pass the departmental examination with the second year of the probationary period. Failure to pass the examination may result in termination of service and will in any case, involve stoppage of increments. In case, where the probationary period has to be extended for failing to pass any or all the departmental examination within the stipulated period on their passing the departmental examination and being confirmed after expiry of extended period of probation, the drawal of the first and subsequent increments will be regulated by the Rules and orders in force from time to time. It must be noted that a second chance to pass any examination will, as a rule, not be given except under exceptional circumstances and only provided the other record of the candidate during the period of his training is such as to 'justify suo' relaxation being made.

7. The appointment and pay as a probationer will commence from (a) the date of completion of four years of apprenticeship or (b) the actual date of completion of training whichever is later. Service for increment will subject to paragraph 6 above count from the date of appointment as probationer.

NOTE 1.—The retention in service of the probationers and the grant of annual increments are subject to satisfactory reports on their work being received at the end of each year of probation.

NOTE 2.—Service as probationer may be terminated on months notice on either side.

8. Particulars as to pay and general conditions of service prescribed for officers in the Indian Railways Service of Mechanical Engineers will be found in Appendix IV.

APPENDIX IV

PARTICULARS REGARDING THE INDIAN RAILWAY SERVICE OF MECHANICAL ENGINEER

1. The probationary officers will be on probation for a period of three years during which their services will be liable to termination on three months' notice on either side. They shall undergo practical training for the first two years. Those who are reported upon and considered to have completed successfully the two years' training will be given charge of a working post provided they pass departmental and the other examinations as may be prescribed. It must be noted that a second chance to pass any examination will as a rule not be given except under exceptional circumstances and only provided the other record of the candidate during the period of the training is such as to justify such a relaxation being made. Failure to pass the examination may result in the termination of service and will, in any case, involve stoppage of increment. At the end of one year in a working post the officers will be required to pass final examination both practical and theoretical and will, if successful be confirmed provided they are considered otherwise fit for permanent appointment. In cases, where the probationary period is extended for any reason, on their passing the departmental examinations and being confirmed after expiry of the extended period of probation, the drawal of the first and subsequent increments will be regulated by rules and orders in force from time to time.

Probationers will also have to undergo training at the Railway Staff College, Baroda, in two phases, first during the period of their two years training and again during the period when they hold working posts. The test in the college is compulsory and a second chance in the event of failure will not be given except in exceptional circumstances and provided the record of the officer is such as to justify such relaxation being made. Failure to pass the test may involve the termination of services and in any case, the officers will not be confirmed till they pass the test, their period of training and/or probation being extended as necessary.

NOTE.—The period of training and the period of probation against a working post may be modified at the discretion of Government. If the period of training is extended in any case due to the training not having been completed satisfactorily, the total period of probation will be correspondingly extended.

2. Probationers should have already passed or should pass during the period of probation, an examination in Hindi in the Devanagari script of an approved standard.
